Below is a non-exhaustive list of courses of interest for ES majors and minors that are scheduled for the fall semester. The core courses with ENVR prefixes are set, as listed below. Those with ENVR attributes may still be added, as they are confirmed with the home departments. Use this list as a guide of what will most likely be available.

**Fall 2023 courses**

**Specific ES required courses**
- ENVR201 – Intro to Environmental Studies (x2 sections)
- ENVR362 – Environmental Law and Policy
- ENVR391 – Senior Seminar

For those who are doing an off-campus summer internship for your experiential learning, you’ll need to take this:
- ENVR388 - Individual Internship

**Physical Environmental Science courses**
- ENVR110 – Pollutants in the Environment with lab (same as CHEM110)
- ENVR123 – Renewable Energy with lab (same as PHYS123)
- ENVR250 - Planet Earth: Wind, Water, Fire, with lab (same as GEOG250)
- CHEM316 - Environmental Chemistry

**Environmental Life Science courses**
- ENVR199 – Intro to Biological Thinking (selected sections of BIOL199)

**Other courses that will fulfill an elective (not an exhaustive list - be sure to search by the ENVR attributes)**
- BIOL 351 – Aquatic Ecology with Lab
- ENVR 322 – Global Impact of Climate Change
- ENVR 366 – International Environmental Law
- GEOG260 – Foundations of Geospatial Analysis
- GEOG370 – Global Climate Investment
- GEOG380 – Protecting Health in a Changing Climate

**Spring 2024 courses (more electives may be added as the spring schedule is finalized during the fall, but core courses for the major/minor have already been scheduled and will not be added):**
- ENVR199 – Intro to Biological Thinking (selected sections of BIOL199)
- ENVR201 – Intro to Environmental Studies (x2 sections)
- ENVR230 – Environmental Economics (x2)
- ENVR250 – Planet Earth: Wind, Water, Fire, with lab (same as GEOG250)
- ENVR269 – Environmental Ethics (x2 sections)
- ENVR362 – Environmental Law and Policy
- ENVR364 - Environmental Geology
